

Carbon Credit Trading 101 – What's it all about?

Agriculture Sector – Emissions Trading Workshops

Join Climate Change Central and partners for a 1 day workshop designed to increase your understanding of rules, solutions and opportunities within the Alberta carbon offset trading system. The workshop offers a no pressure, interactive learning atmosphere where participants can take the time to understand the opportunities and risks.

Workshop Objectives

To increase your understanding of:

- Issues and considerations involved with carbon credits within the Alberta Offset System;
- Opportunities for carbon credits in your operation within the Alberta Offset system;
- Carbon credits/offsets as both an opportunity and a risk.

AM

Morning presentations will include the Alberta Offset Trading System, Emissions Trading and Sector Specific Opportunities, including an overview of the Alberta Protocols (standards that define the supply of potential carbon credits).

PM

Following lunch, a brief presentation will be given to set the stage for a mock negotiation. Profiles will be given to participants based on the Protocols developed for the Alberta system. Participants will be broken into small groups and assigned a role as either a buyer or seller. During the mock negotiations, participants will be asked to negotiate a fictitious contract for emissions reductions and removals. Resource people will be present to help you develop fictitious projects, contracts and negotiate a potential 'sale'.

*Each participant will be given a resource package.

*Coffee, refreshments and lunch will be provided.
